

Haris Anjum

ROOKIE DEVELOPER

Profile

I am a sophomore at Ghulam Ishaq Khan Institute (GIKI). I am currently enrolled in Bachelors of Science in Artificial Intelligence. I have a solid foundation in programming languages such as C++, Python and SQL, while having a good grip on web development languages such as HTML, CSS, JS.

As an experienced Software Developer, I possess the skills and knowledge to conceptualize, implement, test, and sustain software systems. My expertise spans across diverse platforms, programming languages, and embedded systems. I am a fast learner, have excellent attention to detail, and am committed to delivering high-quality work, in both individual and team projects.

Education

Matric, Army Public School, Rawalpindi

SEPTEMBER 2017 — MAY 2019

Graduated with 1061 marks

Intermediate, Army Public School, Muzaffarabad

SEPTEMBER 2019 — MAY 2021

Graduated with 1073 marks

BSAI, Ghulam Ishaq Khan Institute of Science & Technology, Topi

SEPTEMBER 2021 — JUNE 2025

CGPA 3.42

Courses

Data Structures & Algorithm

Object-Oriented Programming

Discrete Mathematics

Web Development, Udemy

Extra-curricular activities

Debate Competition, Beaconhouse School, Bahawalpur

I won multiple debating contests held at my school.

-Won the first prize in the competitions

-Successfully defended my stance on the given topic showcasing effective communication and persuasive abilities.

Debating against the best debaters gave me insight into how other people think and how to convey my point to a group that has a different prejudice on the same topic. This helped me look into situations from different perspectives and helped me think under pressure. These competitions also helped in developing my public speaking skills.

ICPC, ACM, GIKI

I was a member of ACM that conducted the regionals of an international programming competition known as the ICPC.

- Managed the logistics and operations of the event, demonstrating effective project management skills.

- Collaborated with team members and external stakeholders to ensure a smooth and successful event

- Learned from the technical expertise and innovative problem-solving approaches of the top programmers in Pakistan, gaining valuable insights and inspiration to enhance my own programming skills.
